**Re: Product Discontinuation Notice – xEMT, Externally Modulated 1550nm CATV Transmitter**

Dear Valued Customer,

Thank you for your support of Emcore products. This letter is to inform you of our intention to discontinue the family of 2100 xEMT series of externally modulated 1550nm CATV transmitters.

As market dynamics change, driven by technology evolution, new customer requirements, and price pressure, we ensure that our product portfolio meets these critical demands. Emcore Corp is committed to provide long-term solutions and returns on investments for our customers.

Please be aware that Emcore is offering a last time buy opportunity for this product family effective immediately. We will accept last time buy orders while supplies last, or until April 30, 2010, whichever comes first. After April 2010, Emcore will no longer accept orders for this product family. Emcore is committed to maintaining after sale service of the 2100 xEMT series throughout the product's warranty period.

As a replacement, Emcore is offering our next generation Medallion 5000 product (MDL 5000). This product represents the latest in externally modulated 1550nm transmitter with a performance and feature list that surpasses the xEMT series. Enhancements include extended operation bandwidth to 1 GHz, dual redundant hot swappable power supplies, Telnet and SNMP communication interface and more. Please go to the [www.emcore.com](http://www.emcore.com) to view the latest MDL 5000 data sheet. The MDL 5000 is available for purchase immediately.

Thank you again for your support of Emcore products. Should you have any questions or concerns regarding this notice, or assistance in qualifying the new Medallion 5000 platform, please feel free to reach me at (626) 672-5600.

Sincerely,

Grant Olecko  
Product Marketing Director
